girl to navigate the dangerous waters below the falls, and she set a new record for the trip, crossing in ten minutes, a minute faster than the record held by William "Red" Hill, veteran Niagara riverman.

township, was on Saturday last totally destroyed by fire which is thought to have been of an incendiary origin. It is reported that an investigator from the fire marshal department will enquire into the fire.

Outboard motorboat and yacht races will be featured on the Canadian National Exhibition aquatic sports course.

Four Meet Death, 21 Hurt

When Truck Strikes Auto Drummondville Residents Victims—Deaths Instantaneous

Drummondville, Que.—Four persons lost their lives and 21 others were injured during a collision between a motor truck and an automobile on the main highway near Rivière Noire Sunday night. Earlier reports reaching here had placed the death toll at six. The motor truck, containing nearly 40 passengers, was headed for a political contradictory meeting at St. Eugene while the automobile, containing four persons, was en route to Montreal.

The dead are:

Joseph Allard, 20.
Maurice Geoffroy, 18.
Charles Edouard Denis, 65.
Paul Gagne, 23.

All four were residents of Drummondville or its immediate suburbs and all were instantly killed. Allard, Geoffroy and Denis sustained fractured skulls while Gagne died of severe internal injuries. The dead were all occupants of the truck.

The automobile was driven by George Bessette of Montreal, who had his wife and two children with him. His six-year-old son, George, Jr., was severely hurt about the head and body and is in a critical condition. The others in the car escaped with minor injuries.

Many of the truck occupants were severely shaken. Among the more critically injured were Amodeo Lafontaine, 35, internal and head hurts; Edward Lapierre, 50, cut about the head and body; Leopold Yergeau, 15, fractured skull and other severe injuries; Ubaldo Beauchemin, head and body injuries. They are all residents of Drummondville and are in hospital here. Others hurt received minor injuries and were allowed to go home.

An inquest will be held. According to information gathered by police the motor truck was taking the men to St. Eugene where Hon. Hector Laferte, Minister of Colonization and Liberal candidate for Drummond, and Napoleon Gagneau, his Conservative opponent in the provincial elections, were to hold a contradictory rally.

At Rivière Noire the truck crashed into Bessette's automobile, which had slowed down in order to turn into a side road. The automobile was shoved into the ditch and turned over while the truck spun before lodging on its side. Its passengers were scattered in all directions while a few were crushed under the vehicle.

Doctors and priests from every village in the vicinity hurried to the scene to give first aid and the last rites of the church.

Runaway Train Wrecks Auto

Five Hurt When Cars Break Away During Switching

Bault 4th, Mo. — Five automobiles were injured when a train of nine freight cars broke away during switching operations, careened down a grade and smashed into an auto at a level crossing here over the week end. The occupants, thrown from the auto, escaped death, though the vehicle itself was dragged 250 feet along the track. Four other cars were derailed and overturned and the wreckage piled along the track blocked the line for some time.

The injured are: Thomas Harper, 41, 141 Calhoun Street, face, head and hands badly cut; Mrs. Thomas Harper, 51, cut on face, head and mouth; Mrs. J. B. Baker, 65, 15 St. Mary's Avenue, broken leg and other injuries; Gerald Harper, 16, broken arm and face badly cut; Lawrence Marshall, 19, West Korah, badly cut about the face. Harper, who was driving the car, is in the Plummer Memorial Hospital, and the others are in the General.

Ray Featherstone, 238 Wellington Street, conductor of the train, told police that the cars had got away from the yard at Bruce Street during switching operations. He said he had not the brakes on the cars which did the damage, and did not know just how they got into the locality where the damage was done.

Canadian Immigration Shows a Sharp Drop

Ottawa. — Under present stringent regulations immigration to the Dominion has all but ceased. For the month of June there was a decrease for the first quarter—April, May and June—of 76 per cent from June of 1930, and June—of the present fiscal year, the total of immigration was 10,186, as compared to 43,939 in the corresponding period of last year.

June saw only 3,169 persons admitted, a drop of 10,000 from last June. For the quarter there were admitted 9,334 British immigrants, 4,997 from the United States and 1,350 from other countries. Last year in the corresponding months there were brought in 16,557, 9,519 and 22,731 respectively. Regulations provide that only two classes of immigrants may enter from Continental Europe—wives and unmarried children under eighteen joining families—be established in Canada. — Immigration to look after dependents, and agriculturists with sufficient capital to undertake farming in the Dominion.

Record Salmon Pack Recorded

British Columbia Produced 2,221,819 Cases in 1930

Victoria. — In the year 1930 British Columbia produced the greatest catches of salmon in the history of the province with a pack of 2,221,819 cases, surpassing the previous record of 1926 by 156,029 cases, according to figures contained in the 1930 report of the provincial fisheries department. There was an increase in both the pack of sockeye and pink. The pink pack constituted 50 per cent of the total.

The value of fishery products in the Dominion for 1929, the latest figures available at the time the provincial report was written, was \$52,518,921, of which British Columbia produced \$22,980,098, or 45 per cent.

Commenting on the Fraser River system, the report says: "The catches of sockeye in the Fraser River system in 1930 demonstrated conclusively that the former great runs of sockeye in that system can be restored."

Lawrence of Arabia In Fresh Role

Pilots Mystery Launches Pre- paratory to Schneider Trophy Races

Plymouth, England—Aircraftman T. H. Shaw, known to the world as Colonel Lawrence, the uncrowned King of Arabia, is the central figure in a secret Royal Air Force development at the seaplane base here.

One of the most spectacular craft taking part in the preparations for the Schneider Trophy race next month is a blue and aluminium 100 horsepower seaplane, a motor ship, which dashes across Plymouth Sound at fifty miles an hour.

Whichever from Plymouth flies, the seaplane on this strange boat, one at the tiller a small smiling man in Air Force blue, with fair hair and blue, rosy cheeks. He is Aircraftman Shaw.

He is sometimes in charge of a large launch, which, with the seaplane, will be held in readiness during the Schneider race. Their terrific speed has been developed that they may dash to save the lives of the world's fastest seaplane should any accident occur in the sea.

Aircraftman Shaw has been testing these craft, and their maximum speeds are known only to him and higher authorities of the Air Ministry.

Expert Is Appointed To Help Newfoundland

London.—Sir Richard Aikens, premier of Newfoundland, officially announced here that Sir Percy Thompson, deputy chairman of the Board of Inland Revenue here since 1919, has been selected to collaborate with the Newfoundland Government in connection with the new fiscal program dealing with revenue and expenditure and public debt.

The selection of Sir Percy was made after consultation with the Secretary of State for the Dominions, Rt. Hon. J. H. Thomas, the senior official of the dominion's office, as well as Sir Warren Fisher, permanent head of the British Treasury, and leading officials of the Treasury, Sir Richard said.

Robert J. Magar, well-known business man of Montreal, has been selected to associate himself with the Newfoundland Government for consultation regarding the reorganization of the public services of Newfoundland, especially the Newfoundland railway, steamships, drydock, telephones and telegraph systems.

Clean, Shining Apples Attracts the Trade

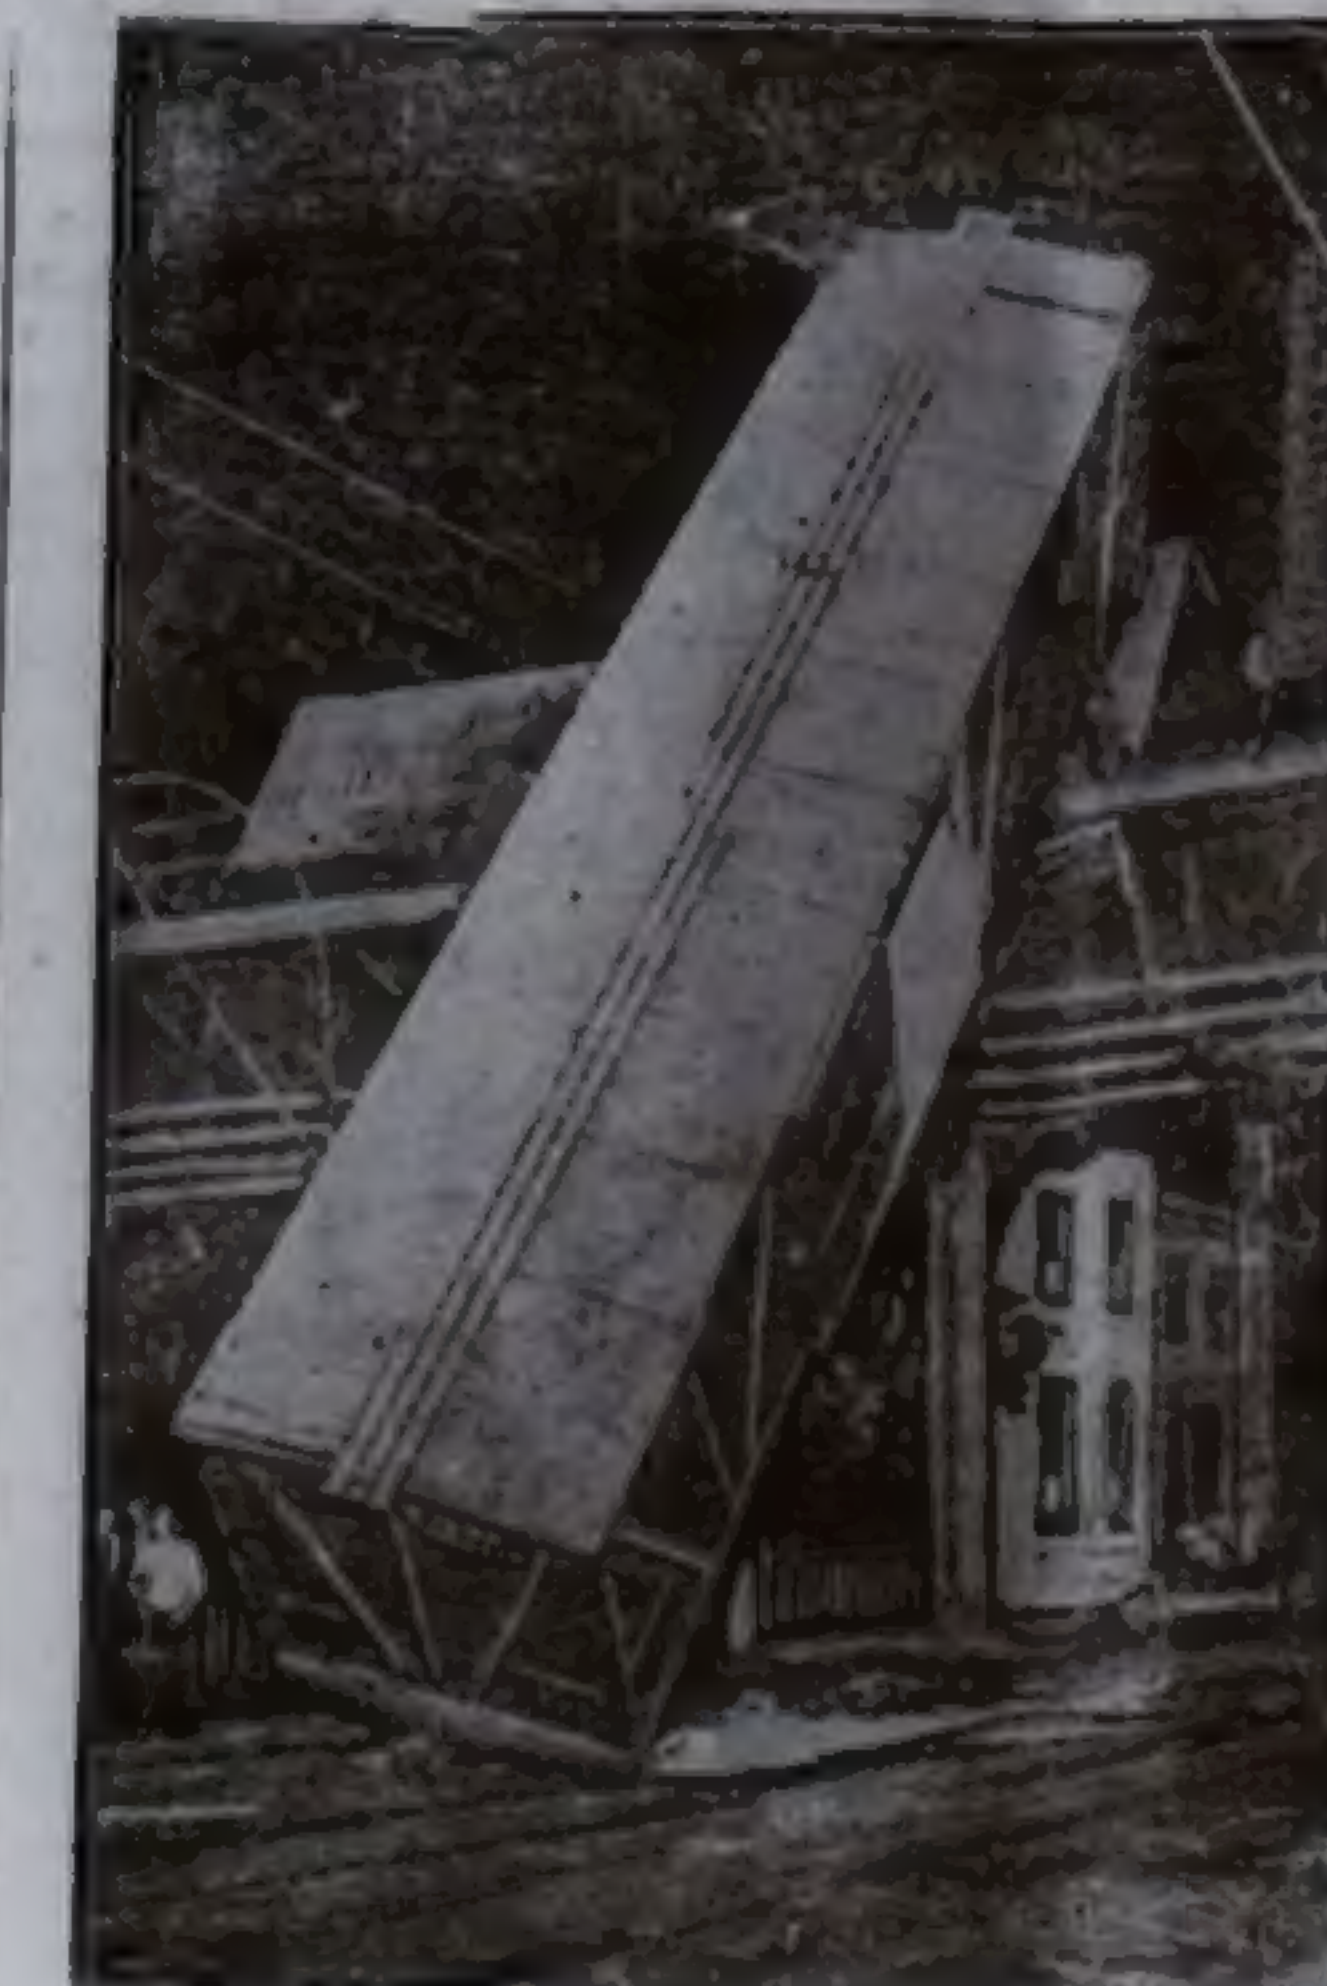

Burlington, Vt.—Lauding apples to increase their retail market "appealability" is the newest "wrinkle" in horticulture, according to Prof. M. R. Cummings, of the University of Vermont, who said in a recent radio talk that "nobody wants to eat a dirty apple any more." Professor Cummings added that "washed and polished apples will soon be on the market."

The horticulturist explained that machines have been developed for washing, rinsing and wiping the fruit. The retail salesman, he said, may now put away his towel.

Conference at Amsterdam to Tackle World Problem

Amsterdam, Holland.—Efforts to find a way out of the world's present economic situation were to be made by some 200 economists, industrialists, labor leaders and government officials, representing 30 countries, who met in a world social and economic congress here last week.

Car Jumps Tracks

A graphic action picture of a car which jumped the tracks and fell from an elevated line in Philadelphia, Pa., just after a loaded trolley car had passed. Night other cars were derailed resulting in a tie-up on the spur.

Muskoka Fires Under Control

Twelve Minor Blazes Re- ported in Sault Area

Perry Sound. — Following an airplane flight over the whole area affected by forest fires, as far south as Wabigoon, Peter McEwen, head of the local branch of the forestry department, stated Sunday that the situation was well in hand. One or two serious fires are burning, one on the east side of Ryde Township, and one at Carling Station, about 20 miles north of Perry Sound on the S.P.R., but all are completely under control.

Over 60 men are engaged in quelling the flames, but Chief Ranger Simpson, who was dispatched to Ryde Township to direct forestry operations there, has returned to his post at Porcupine as the situation at the former place is now considered out of danger. "There is no cause whatever for alarm," said Mr. McEwen.

New Fires Reported

Sault Ste. Marie, Ont.—Twelve new fires were reported in the Sault district since Friday, although all of them are of a minor nature. This brings the total number reported to the local forestry branch to 34 in the past two days, one of the largest in some time.

Only one of the fires burning is regarded as being of a serious nature. It is in Township V, up the White River and north of Sawbush Lake. Sunday 100 men were on the scene and had it well in hand.

Sunflowers

Royal lovers of the sun, lifting up their shields of gold, arrayed in daisy splendor every one; Royal lovers of the sun, their flaming papyrus boughs, high and eager, their hold—Royal lovers of the sun, lifting up their shields of gold.

—Manda de Verne Morison.

Beads, about 5,000 years old and made in clever imitation of pearls and gold, have been discovered in a grave recently opened in Egypt.

Chinese Rivers Rise Thousands Perish

Flood Waters Reach a Height Never Previously Recorded

Hankow, Hupao Province, China.—Countless hundreds and perhaps thousands drowned last week when the flood waters of the Yangtze slowly levelled dykes, undermined cities, and destroyed the farms upon which the country depended for its food.

The flood waters reached a height of 53 feet 4 inches, compared with the previous record in 1870 flood of 40 feet 6 inches. This placed the highest point of land in Hankow five feet under water, and submerged most streets 12 to 20 feet. The famous Bund is 10 feet below the surface.

There is no way of telling how many the flood has killed. A week ago the Corps Recovery Society, which had counted the bodies taken out of the river, made an estimate of 8,000. That was before the waters climbed above the 1870 mark. Since then whole towns and villages have been wiped out, undermined houses falling in upon those lacking the foresight or the strength to flee. There was no way of communicating with other parts of the valley. Boats were being used mostly to carry refugees down the river.

80-lb. Sturgeon Caught By French River Camp

French River, Ont.—Using frog bait and an ordinary 15-pound test bass line, Ellis Allen, Jr., of Louisville, Ky., who is a guest at the French River bungalow camp here, landed an 80-pound sturgeon from the French River over the week-end. This is the largest sturgeon ever brought into the camp since it was opened 11 years ago, and it took Mr. Allen two and three-quarter hours to land the monster.

Jean—"So you married your own boy. How long did you work for him?" Jane—"Until I got him."

High, Clean Jump

Sixteen Years Since There Has Been Nursery at Rideau Hall

Members of the Governor-General's household both in Harrogate, the temporary vicarage residence in Montreal, and at Rideau Hall in Ottawa, are rejoicing at the birth of a blue-eyed baby son, weighing ten pounds, to Lady Bessborough.

It is stated that it is now 16 years since there has been a nursery in Rideau Hall, whether the Governor-General's family and entourage are expected to return as soon as Lady Bessborough is able to travel.

In 1916 when the Duke of Devonshire came to Canada as Governor-General, his youngest child was Lady Anne Cavendish, at that time seven years old. A beautiful nursery and playroom was then fitted up for the little girl.

Plans are now under way for an infant's nursery to be installed at Rideau Hall, adjoining Mrs. Bessborough's suite. Special rooms for the baby have been engaged and the furnishings and fittings of the nursery will be the simplest of design.

The return of the child regains at Rideau Hall recalls memories of past happy family associations of past Governors-General. It will be within the memory of many that the present Earl of Minto, who married a Canadian, Miss Marion Cook, of Montreal, was only seven years of age when his father became Governor-General in 1898. Lady Ruby Elliott and Lady Violet Elliott were nine and 13 years of age at the time. Lady Violet is now the wife of Col. John Jacob Astor, M.P., a son of Lord Astor.

Seed to be Issued For Test Purposes

The area of autumn sown crops in Ontario annually is not far short of a million acres. The principal crops coming under this head are winter wheat and winter rye, with hairy vetches, winter dunnor and winter barley grown to a limited extent.

In spite of falling prices, winter wheat continues to be one of the major crops of the province. This crop, which yields on the average several bushels per acre more than spring wheat, works very nicely into the farm rotations of a large part of the province and is an excellent crop on which to seed, early in the spring, grasses, clovers, and other legumes.

Experiments conducted for a period of several years at the Ontario Agricultural College and the experience of farmers who have tested and grown the crop emphasize the value for the farmers of Ontario of the O. A. C. No. 104 and the Dawson's Golden Chaff (O.A.C. No. 61) varieties of winter wheat. In yield and straw strength these two varieties have proven themselves to be superior to over three hundred other varieties tested at Guelph.

Wet weather at harvest time has caused some sprouting in winter wheat and farmers will be well advised to sow only unsprouted seed. Careful tests indicate that the more winter wheat is sown, the more value it has for seed.

The results of careful rotation experiments conducted at the Ontario Agricultural College show that best results were obtained when winter wheat followed clover seed, alfalfa, sweet clover, field peas, or summer fallow. Less favorable results were obtained when winter wheat was sown following a crop of buckwheat or timothy seed.

The largest yields and best quality of crop resulting in the experiments at the college when winter wheat was sown at the rate of one and three-quarters to two bushels of seed per acre and during the period August 15th to September 10th.

The sown variety of winter rye continues to be the outstanding variety grown at the experiment station at Guelph. In the average of the last thirteen years this variety outyielded the Common by an average of 7.4 bushels per acre per year.

Winter barley, although increasing in winter hardiness as a result of many years of continuous selection at Guelph, is still more subject to winter killing than either winter wheat or winter rye.

The exceptional results of the last few years are due to the fact that the seed used was of high quality and was sown at the proper time.

The Ontario Agricultural College is preparing to distribute to the farmers of Ontario this autumn the best seed of selected varieties for the following co-operative tests:

- 1—Testing three leading varieties of Winter Wheat
- 2—Testing one leading variety of Winter Rye
- 3—Testing Autumn Applications of five fertilizers with Winter wheat
- 4—Testing Autumn and Spring Applications of Nitrate of Soda and Common Salt with Winter wheat
- 5—Testing Winter Emmer and Winter Barley
- 6—Testing Hairy Vetches and Winter Rye in Fodder Crops
- 7—Testing Mixtures of Hairy Vetches and Winter Rye for Seed Production
- 8—Testing O.A.C. No. 104 Winter Wheat at three dates of seeding
- 9—Testing Dawson's Golden Chaff (O.A.C. No. 61) Winter Wheat at three dates of seeding
- 10—Testing Rye in Fodder Crops at three dates of seeding
- 11—Testing Rye in Fodder Crops at three dates of seeding
- 12—Testing Rye in Fodder Crops at three dates of seeding
- 13—Testing Rye in Fodder Crops at three dates of seeding
- 14—Testing Rye in Fodder Crops at three dates of seeding
- 15—Testing Rye in Fodder Crops at three dates of seeding
- 16—Testing Rye in Fodder Crops at three dates of seeding
- 17—Testing Rye in Fodder Crops at three dates of seeding
- 18—Testing Rye in Fodder Crops at three dates of seeding
- 19—Testing Rye in Fodder Crops at three dates of seeding
- 20—Testing Rye in Fodder Crops at three dates of seeding

1,000 Phone Calls Made Daily Between London and Paris

Washington.—The average of telephone calls between London and Paris is more than 1,000 per day. Recent political events have resulted in heavy telephone traffic between London and the Continent, especially with Germany. One day the excess over the normal reached 25 per cent, the total for the day being more than 1,250 calls. The daily average, however, is larger than that.

A Solomon's Judgment

A case that was brought before the local magistrate involved the rights of ownership of an eight-day clock. After hearing both sides of the argument the magistrate turned to the prosecutor.

"You got the clock," he told him gravely.

"Look here, what do I get?" complained the defendant furiously.

"You got the eight days," snapped the magistrate.

Truth is so impossible to be caught by any outward touch on the surface.—John Milton.

The world's great men have not commonly been great scholars, nor its great scholars great men.—Oscar Wilde.

Here and There

Great Britain used 1,000,000,000 gallons of petrol last year.

A banana plant bears a single bunch of fruit and is then cut down.

Whales have been caught with as much as two tons of shrimp inside them.

There are 5,167 public houses and beer-houses in the London County area.

There are 653 Justices of the Peace for the County of London and 7 for the City.

People who go to the seaside to recuperate after illness should indulge in sun-bathing only on medical advice.

Great Britain's total population is 44,799,465; this is over 2,000,000 higher than the figure for 1921.

Americans are fond of sweets, their consumption of chocolates and candies last year working out at 12.50 per head of the population.

One of the largest forests in the world, situated between the Ural Mountains and the Obdorsk Sea, in Russia, stands on ice.

In spite of the increase in unemployment figures, British industry as a whole employs 737,000 more workers than it did five years ago.

It is now possible to travel from London to Karachi, India, by regular aeroplane services, in a few hours over five days.

With the exception of Belgium, Britain is the most densely populated country, with 695 persons to the square mile.

A gas which stops an aeroplane if any enters the engine is the latest German device in the war against aircraft.

An offer of free telephone installation in Rome, Italy, during May, brought in 13,000 new subscribers.

After London, Britain's largest cities are Glasgow, with 1,066,417 inhabitants, and Birmingham, with 1,062,412.

Divorces are becoming much more common. In 1921 there were 366 cases in England, Scotland, and Wales; in 1929 there were 3,204.

Organized airlines now cover 130,000 miles in regular routes, over which 600,000 passengers and 13,000 tons of mail and freight are carried every year.

Among private motor-cars, the average horsepower is 13.11, the average petrol consumption 20 miles per gallon, and the annual average mileage 7,000.

One big firm of drapers in the West End of London estimate their annual losses through shoplifting at £10,000. They prosecute thieves at about 300 cases every year.

A cow avoids to some extent, but in some the worst glands are not abundant except at the end of the nose. That is why a cow avoids freely on the muzzle while preoccupation is hard to perceive elsewhere on her body.

Among the true ostriches of the Old World several females lay their eggs in the same nest and the male sits on the eggs during the night while the hens take turns at the job during the day.

All fish have an organ very similar to the human ear, by which they maintain equilibrium, and through which they are conscious of sounds and vibrations in the water about them.

"Red snow," which is to be found on Vancouver Island, is puzzling the scientists. Where the snow lies deep it is of a decided red color, although when a handful is picked up it appears white.

Sea ching all over the world for rare mice is the unusual hobby of a young man, who has discovered innumerable types ranging from the rim of rain down to less than one inch and a quarter in length.

New Delhi, the seat of Government in India, is only used half the year, the result being that for six months out of every twelve it is a deserted city, with miles and miles of empty streets.

Divorce is now very common in China. A married couple simply write down a declaration of their desire to separate and sign it before two witnesses who also sign. They then are divorced. If, however, either party objects, a court action is necessary.

Approximately 10,000 head of cattle have been shipped from Canada to the United Kingdom so far this season, according to information in the office of the Hon. Robert Worr, Minister of Agriculture.

Believed to be the oldest ship afloat, the Success, sole survivor of the old-time convict fleet which journeyed between England and Australia, remains in her original state and sails round the world as a "sideshow."

Large enough to supply 2,000 portions, the world's biggest apple pie, recently made at Birmingham, was 15 ft. long, 10 ft. wide, and 2 ft. deep. It contained 4½ cwt. apples, 1½ cwt. flour, ¼ cwt. lard, and 50 lb. sugar, all British produce.

Ducks and certain waterfowl do not get wet because their feathers are kept in an oily condition by small oil glands. While paddling about in the water, ducks frequently bend back and rub oil on their heads from the glands at the base of the tail, and then oil their feathers with their heads. In addition to being supplied with oil, the feathers of a duck are exceeding dense which aids in keeping out the water.

Especially good for CHILDREN

Children can eat all they want of this nourishing whole milk food. On green crackers... toasted... or in tempting sandwiches for school lunches. Velveeta contains all the elements of rich whole milk. It is digestible as milk itself.

Find Animal Life Waxes Then Wanes

Strange Outside Influence Dominates Man, Beast and Plant—Great Laws Link All

Manakok River, Que.—Many interesting and surprising facts concerning animal life were revealed at the Canadian Biological Conference held recently in Manakok River, Quebec. The conference was held at the Hotel Manakok, a fine building in the heart of the city.

Dr. H. H. Henshaw, of the University of Toronto, presided over the conference. He opened the conference with a paper on "The Influence of the Environment on the Life of Animals."

Dr. Henshaw's paper dealt with the influence of the environment on the life of animals. He pointed out that the environment is a complex of many factors, all of which influence the life of animals in some way.

Dr. Henshaw also pointed out that the life of animals is not only influenced by the environment, but also by the life of other animals. He pointed out that animals are often influenced by the life of other animals in a way that is not yet fully understood.

Dr. Henshaw's paper was well received by the conference. It was one of the most interesting papers presented at the conference.

The conference was a success. It was a very interesting and profitable meeting. It was a great opportunity for biologists to meet and discuss their work.

The conference was held at the Hotel Manakok, a fine building in the heart of the city. It was a very comfortable and convenient place to hold the conference.

The conference was held from August 1st to August 5th. It was a very short conference, but it was a very successful one.

Hilltop and Aunt Ellen

I suppose there are some things we heard close to memory and which, to the naïveté of our childhood, we think can never change. So the little town of Hilltop was with me. And the strange part is that it is difficult to say why. My acquaintance with it was limited to about six short summer vacations in childhood, during which my family occupied a cottage just across the creek from the little town itself. To reach this quaint village you came down a long green meadow from the white clapboard house, passing under a great elm, its green somewhat grayed with the years, and under which the town bells will tell you Indians once held their powwows, crossed the bridge and walked up a little dirt road, and presto! you were on Hilltop's main street.

Doubtless all of us remember some such old village with a white covered bridge leading into town and, perchance, a red one leading out, with board sidewalks lying between. I suppose all of us must remember, too, how hardily that which we misname progress has encroached slowly but surely upon all which we once held hallowed. So you will understand how ready I was to be carried back some time ago, to be greeted, first by a new concrete bridge, and second, by a sign announcing the virtues of Hilltop's Royal Hotel—one hundred rooms and bath, with a radio in every room. Now, I would be the last to disparage the obvious advantages and utility of one hundred rooms with bath, to say nothing of an equal number of radios; but oh, I did miss the old covered bridge!

I missed its dusty shade and the chiming in its roof that let the sunlight filter through to the floor in multitudes of fantastic shapes. I missed, too, the old board walk, now concrete, that led to "Jack's General Store, Dry Goods and Notions," now the Hilltop National Bank. I had counted upon Jack's with its cool dimness and open cracks; barrel and the yellow cheese under glass covers. But again I was forced to bow to progress and forego an old and cherished delight.

Once there were canals and river warehouses dotted the outskirts of the old town, but the canals are long since gone and the warehouses are deserted now. There is no use for such, for the trains have come and the motor trucks and, yes, even airplanes. In place of the dusty romance of bump

and lurching and far is a cold, sterile cleanliness of a modern factory that makes little paper boats all day long. There is a challenge of brick and stone everywhere, and I thought all had yielded to its insistent clamor. It was with some misgiving, then, that I walked up a familiar tree-lined street to Aunt Ellen's. I had not seen her for years, and I wondered a little if progress, too, had had its way here. As I walked, I remembered our meeting. It was upon the occasion of my first trip alone from our summer cottage to town. I was very brave in my own assurance of eight years. The journey held no terrors with which I did not feel equal to cope. I was coming down the narrow boardwalk, she was coming up; and, in order to give her room to pass, I stepped too wide and stumbled down. Instantly to the street. In a second she had picked me up, wiped off my face with a handkerchief dab to my nose with her white handkerchief smelling sweetly, I know now, of lavender.

"Would you," she inquired, "like some gingerbread?"

"O delectable woman! Had she said chocolate cake, I would never have yielded. Even lemon tart would have found me somewhat reluctant. But gingerbread?"

"Here it is," I inquired, "rain-forest?"

"Rain-forest," she assented and smiled. So from that meeting we became fast friends, and I called her, for no reason that I know about now, "Aunt Ellen."

It was with such thoughts that I walked up the vine-shaded path to the old colonial doorway under its grape-like gloom. My heart beat faster as I lifted the brass knocker. She might not remember and she might have changed. And I thought desperately of lebbied hair and brighter dresses. But it was the same familiar face that answered my knock. It might even have been the same black lace dress and white collar. She peered at me intently for a moment, and for a second I had a desire to run away and hide from my impending disappointment. But then she stepped back and opened wide the door.

"Come in," she said simply. "The gingerbread's all done."

"With rain-forest?" I inquired cautiously.

"Rain-forest," she laughed.

"And I know there are some things that do not change.—J. C. R."

sent a number of curves indicating an eleven-year cycle in tree growth, agricultural production, the value of fish and abundance of animals. It was thought, however, that much of the evidence advanced in support of the eleven or twelve year cycles fitted equally closely into a cycle of nine to ten years.

More significant was Dr. Huntington's chart showing a distinct cycle of droughts and of agricultural production. One of the most interesting of such wanderings is the migration of sperm whales, described by Dr. Charles Townsend of the New York Aquarium. The minute forms of life upon which these huge animals feed are abundant only in summer. In order to obtain the huge quantities which form their meals the whales each year wander back and forth over routes 5,000 or 6,000 miles long, enjoying our summer in the Northern Hemisphere and moving to the Southern Hemisphere for the Southern Summer.

Fish Affected Differently

The fish of the sea apparently are affected by different influences and in different manner from land animals, as shown by Dr. Harry M. Kyle of Hamburg and Glasgow. Their numbers may vary enormously, but a year in which fishermen do not catch a normal quantity of fish does not necessarily mean that there are fewer fish than usual in the sea. The ocean is so huge that the best food supply or the best spawning grounds may lead the fish to concentrate in parts of the ocean where there is commonly little fishing.

The rate of reproduction in a casual factor in fluctuations is also emphasized. The average litter of snowshoe rabbits tends to increase in certain years and to decrease when scarcity of food occurs. Dr. Huntington showed that even in man the rate of reproduction is closely correlated with climatic conditions. A rapidly increasing race like the Japanese would decline in numbers if the relative rates of deaths and of conceptions resulting in living births stayed steadily at the levels of September, when health and vigor are at a minimum.

"One of the outstanding features of the conference," Dr. Huntington says, "was the frequency with which was emphasized the fact that in spite of minor differences the general reactions of men, animals and even plants to physical environment are essentially the same. Certain great laws seem to run all the way through the whole realm of life, and one result of the working of these laws in cycles are a very widespread phenomena."

NOT PAID FOR EITHER

"You say that your shoes better you? If the proverb is true, you have not paid for them."

"They should! Do my hat and my suit hurt me?"

The most peaceful place in which to live is within one's house.

Future Bobby Jones?

Jimmy Ernst, aged 7, who finished with score of 73 for nine holes in recent children's golf tourney.

LOVE

No one has ever loved, because no one has seen God.

"What Lovely Tea!"

You hear that wherever Red Rose is served. Why not serve it yourself?

Busy With Great Thoughts

I have walked barefoot along stretches of benches. Mile on mile in meditation. My thoughts have come in rhythm with my stride, slowly, across the waste. O'er land and sea and sky, seeking their destination in my heart.

So I have walked barefoot and been oblivious. To sinking of my feet in road along my way.

Oh, I have been oblivious to laws and labors. Of the water's sweep and wrong beside me, been oblivious. Within great thoughts.

I have been busy. —Carl John Beetselmann, in Christian Science Monitor.

Aluminum-Plated Iron Incapable of Oxidation

London.—A new process for the plating of iron with aluminum has recently been evolved in Sweden, says Engineering. The process is the result of experimental work by H. Johansson, of Stockholm. The plating process is carried out at a temperature of 90 deg. C., and it is stated that the aluminum not only covers the surface of the iron effectively, but penetrates into the base metal to a certain extent. The resultant product, it is claimed, resists oxidation, and the influence of corroding gases and acids. The process has been subjected to a series of tests at the Sandviken Iron and Steel Works, and this concern has acquired the sole rights for Sweden, Norway, Denmark and Finland, for the use of it in connection with the manufacture of cold-drawn and rolled tubes, and cold, drawn iron strip, which latter product is extensively used for the packing of pulp wood. At the present time, the process is being tested in connection with the manufacture of hot-rolled sheets and such appliances as kitchen ranges, stoves, dairy utensils and metal miners.

"Why are you looking so fed-up?" "I bought a book called 'How To Make Love' and now I don't know what to do."

"Why?" "Well, it says you should take the girl's hand, look into her eyes, and say, 'I love you, Beatrice!'"

"What's wrong with that?" "My girl's name is Lizzie."

HE COULDN'T READ FOR INDIGESTION

"For some years previous to 1929 I was subject to indigestion, with headache and thousands of stars appearing in my eyes, which prevented me from reading. I decided to try Kruschen salts. That was August, 1929, and I have taken a little in my first morning cup of tea ever since. I now eat my food and am entirely free from indigestion or 'stars.'—F. C."

Now let it be said quite definitely, that what Kruschen did for him, it will do for everybody else who suffers from indigestion or constipation. The fact is that "the little daily dose" of Kruschen salts is a powerful aid to complete, regular, and unobstructed elimination of all waste matter every day.

Soon after you start on Kruschen you will begin to feel the benefit. You will find to your satisfaction that you are able to enjoy your food without any distressing after-effects. And, as you persevere, you will see that the relief which Kruschen brings is lasting relief.

Neighbor Suggested Compound

"It took away the Pain"

"I HAVE been married for ten years. I had one child who would be seven years old now if he had lived."

"My husband and I are both very fond of children. A neighbor told me about Lydia E. Pinkham's Vegetable Compound and I have been taking it for about two months. It took away the pain I used to suffer and I am getting well and strong."

This medicine is helping Mrs. Kenneth Cooper of 9 Division St. Halifax, Nova Scotia. It will help you, too. Won't you buy a bottle?

Local Items of Interest

The bicycle found last week bearing serial number 7464 has been claimed and returned to the owner by Chief Demill.

Fine diamonds in the latest mountings ranging in price from \$15.00 to \$100.00 are being shown at Vernon Tuck's.

The annual fruit tournament of the Grimsby Lawn Bowling Club will be held on September 5th, when many outside rinks will participate in this big annual event.

Councillors Chivers and Lewis represented the Grimsby council at the funeral of the late James Armstrong, contractor, at Hamilton on Saturday afternoon.

Mrs. Howard Caudwell will be sending another bale of woollens to the mills at the beginning of September and Women's Institute members and friends are invited to join in. For particulars phone up 441.

For all Veterans who wish to attend the Veterans Day Parade in Toronto, on Saturday, August 29th, there will be transportation arranged which will leave the Armouries, Grimsby, at 10 a. m.

A bicycle was found in a railway express car at the Beach on Tuesday. It bears a Hamilton license no. 1257, Crescent make, and the rear wheel is missing. Chief Demill has notified the Hamilton police with a view to ascertaining the owner.

The police are investigating the theft of a Buick Sedan, 1927 Model, stolen from in front of the Masonic Temple, St. Catharines. The driver of the car it was discovered, drove to Grimsby, but no trace of him has since been found.

On account of the heavy rains it has not been necessary to pump as much water as usual the past few days. Owing to the warm weather this summer there has been an unusually large amount of water used, it being necessary to restrict sprinkling to specified hours.

Services on Sunday next in Trinity United Church will be conducted by the Rev. E. Burgess, Grimsby Beach. In the morning a duet will be rendered by Mrs. Gordon Eaton and Mrs. Geo. Shepherd and in the Evening Miss Margaret Stewart will sing.

AEROPLANES FOR SCHOOL FAIRS

The Last Article Published explained the construction of 75-A and 75-B, which are for 111 and 114 class pupils. This article is for those who have entered or are entering class 75-C. This is an open class and any Rural School pupils is eligible to compete in this class. The cost of the kit for making this aeroplane which is considerably larger than either of the other two is \$12.75.

Any or all of these kits may be secured from the Agricultural Office, St. Catharines. Special prices are being offered at the Championship School Fair as follows - \$10.00 divided into ten prices from \$2.00 down to 25c for the best ten De Havilland Models and a silver cup is being donated for the best made aeroplane in the three classes 75-A, 75-B, 75-C, by the Arthur Film & Company, Toronto. A medal will be donated to a special prize by this company in each class at the local School Fairs.

This is a non flying scale model, it is made to resemble the actual plane as much as possible.

The sides of the fuselage may be laid out on a flat form in which each part is held in its correct position until the cement is dried, each side must be made on the same form. The form is first drawn on paper from the blueprint, the actual length of each side must be obtained from the blueprint showing the top view.

The wing, tail plane or a rudder may also be laid out on a form which is drawn on paper, the actual size taken from the blueprint.

To make a clean, neat strong job of the covering, first make it of plain writing paper and then cover this with Balsapaper, which is supplied in the kit.

The tail skid is made from aluminum wire with the end fastened. Washers for propeller and wheels may be made from cardboard or aluminum.

Be sure to make a left hand propeller, that is, the propeller passes over the top of the cowling from right to left as seen by the pilot.
 The oil tank is made from piece of balsawood one and one-half by seven-eighths by one-eighth, this is shown on blueprint No. 101A, and the necessary wood is supplied in each kit.
 Before covering the propeller, draw the outline on the propeller block.
 A good effect can be obtained by painting the interior of the cabin white, which makes the cabin fixtures easier to see, although this is not essential.
 An added effect may be obtained by using the following colour schemes.
 1st. A red fuselage, with aluminum wing, stabilizer and rudder and aluminum trimmings, such as window frames, etc.
 2nd. The Royal Canadian Airforce combination is all yellow with a black engine cowling, with tri-color rings on upper and lower sides of each wing tip and each side of fuselage, with red, white and blue vertical bands on the rudder.
 3rd. Most of the builders have ideas of their own for colouring and our suggestion is that you use colour schemes that will be durable and not easily made dirty.

 Local Manager
 E. D. TODD

Wing Covering - First iron out any creases in the paper and allow to cool before using. Lay the wing frame on a flat surface and place a piece of paper larger than the frame over it. It means of thumb tacks, stretch the paper over the frame, placing the thumb tacks around the outline of the wing. When all creases have disappeared apply thin balsawood with brush over the paper around the outline of the frame. Make sure that the balsawood has soaked through the paper to the frame. When the balsawood is dry trim around the edge of the wing, before moving the thumb tacks, with razor blade. If the wing is double covered, both sides will be covered in the same manner.

LOVE LAUGHS AT TELEPHONE TOLLS

Evening rates (7:00 p.m. to 9:30 p.m. local time) are considerably lower than day rates on "any-one" calls. Night rates (9:30 p.m. to 4:30 a.m.) are lower still.

Hospital days were lonely. Of course, her friends did all they could to keep her cheerful - her room was a bower of roses - but how she looked forward to evening when Jack could sit by her and talk of his day at the office.

Then came the news that he must leave town on business. She wondered how she could stand the wait until he came home. But Jack, wise fellow, knew how to bridge the gap. Promptly each evening at nine he called her over Long Distance and told her all the things she wished to hear.

Extravagant? ... not a bit ... for night rates are always inexpensive! What could be worth more for what it cost?

HORSE FOR SALE

A good Farm Horse, used to work with plow, disk, harrow and general farm work, will sell at a bargain.

Also a good one horse Lumber Wagon.

IMPROVEMENTS AT BEACH

(Continued from Page 1)

park never looked more inviting. The cottagers are taking increased pride in making their cottages and surroundings attractive while there have been so few vacant cottages, practically all - them having been taken.

It is noted that quite a few American people are coming in, some of whom are beginning to discover the attractiveness of this summering place for the first time. So impressed are many visitors to the beach with its attractiveness that it would not be surprising if additional cottages are built. During the summer months close to one thousand people make Grimsby Beach on Lake Ontario their place of residence.

Church Burned at Dundas—Loss \$40,000

The insurance adjusters have submitted to the officials of St. Paul's United church, Dundas, the figures for the proposed fire adjustment and the offer is in the neighborhood of \$40,000, including the furniture and church organ. The latter is now adjudged by experts to be a complete loss. A meeting of the official board of the church is to be held next week, when it is likely the award made by the insurance adjusters will be accepted. Once this is done plans for rebuilding can be taken up. There appears to be a growing feeling in the congregation in favor of building an entirely new church.

Corn Sold At Rate of One Cent For Dozen Cobs

From the reports of bucksters on the Hamilton market country produce is becoming a veritable "drug on the market", and prices have had to be slashed to a ridiculously low figure in disposal of any goods at all.

Corn sold on the market the other day at the rate of one cent a dozen cobs. This price was for the best table variety. Those who have corn need not even pay this much for corn, one farmer explained, as some of the market gardeners along the Brantford highway have erected signs at the roadside inviting people to enter and help themselves to corn right off the stalks. The generous gardener who issued this invitation pleaded with his guests not to destroy the stalks when removing the corn, as he wishes these preserved for fodder.

Manufacturers at the Ontario reformatory, Guelph, of Ontario license plates for 1932 will effect a saving of approximately \$17,000 to the department public highways, it was recently learned. Design of the new plates has just been settled by the motor vehicle branch of the department. They will consist of black figures on a light grey background. The cost to the department of the reformatory-made plates of all classes will be 10¢ a pair, as compared with 12.5¢ cents for passenger car markers and 11.5¢ cents for commercial plates last year.

Hamilton Makes Big Gain In Population

The census figures for this year show that Hamilton has a population of 154,914, which is an increase of 26.1 71 per cent. during the last ten years. The figures approximate very closely to the prediction of Assessment Commissioner T. R. B. Robertson that the city would be shown to have a population of 155,000 when the last returns of the assessors were in.
